TRAVEL TO THE FISCHERDORF GRIP

The tour lasts 3.5 hours. Includes a guided tour and 1.5 hours at Grip.

One of the smallest stave churches in Norway is located on the island.

The Grip Islands is located northwest of Kristiansund with a total of over 80 spars and skerries.

Why do we recommend this trip?

14 km north of Kristiansund is the island, which was its own municipality and the smallest in the country until 1964. The island is now without a permanent settlement, but the old settlement is original and serves as a recreational buildings. Fishing was the basis of the settlement at that time and Grip was already a well-known and important fishing village in the Middle Ages.
